

EIK CHEST

The Eik Chest is constructed from solid French white oak and assembled using exposed dovetail joinery that structurally locks the panels together. These joints remain visible at each corner, expressing the method of construction rather than concealing it. The hinged lid is supported by a soft-close mechanism, opening smoothly and holding at any position.

Product Details

The solid French white oak is finished with a natural oil that allows the wood to breathe and respond to its environment. Variations in humidity may result in natural movement, including small cracks or shifts in the grain. These changes are expected and reflect the living character of solid wood, contributing to the piece's evolving surface over time.
